

Brownies make your own adventure!

Innovate Stage 2 skill builder

Are you ready to become an inventor?

Look around you, there are many things that have been invented! Write down as many as you can see in a minute.

There are many different inventions created by women, find out what one of the women below invented or find your own:

o Ruth Wakefield

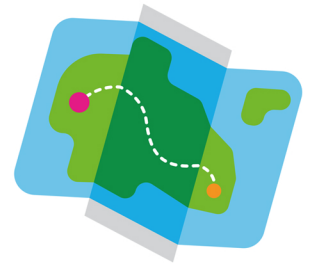

o Mary Anderson

o Sarah Breedlove

o Josephine Cochrane

o (And many more on <https://www.amightygirl.com/blog?p=12223>)

• Now design your own invention! You could improve something that already exists, or maybe you have an idea for something totally new!

Brownie unit meeting activity

Exotic flavours are fun, but where do they come from?

The greater distance food travels to get to you, the bigger impact it has on the environment. This is due to the pollution caused by planes and lorries to transport it.

• Have a look through some of your shopping and see if you can see where different foods have been produced.

• Using an outline of a map of the world, draw a line from the location to where you are. This is called a food mile! You can also track this using an online tool <https://www.foodmiles.com/food/calculator>

• Have some of your favourite foods travelled from far?

• Can you plan yourself a meal or snack with a low number of food miles?

Post your work Facebook so that we can let your leaders know you took part!
